## NMR is currently seeking candidates for a Research Analyst position.

**NMR of Somerville** is a small but expanding consulting firm specializing in the evaluation of energy efficiency and renewable energy programs. Efficiency and renewables are burgeoning fields providing excellent career opportunities in a field that makes a difference.

The ideal candidate will have a Master's degree or Ph.D. in policy, economics, social science, environmental science, engineering or a similar field plus relevant work experience in energy efficiency program evaluation or research. However, NMR will consider candidates with relevant skills and expertise gained in other fields.

Successful candidates will have the following experience:

- Designing, implementing, and analyzing surveys
- Conducting and reporting on semi-structured interviews
- Producing descriptive statistics and performing tests of statistical significance
- Writing clear and concise research summaries, memoranda, and reports
- Managing research tasks, from initial design through final reporting
- Working independently and meeting tight deadlines
- 

Candidates should also have experience using SPSS, R, or Stata (or similar software) for data analysis as well as using Microsoft Office products for developing reports and maintaining datasets, and experience in research design.

NMR is committed to the environment and to minimal greenhouse gas emissions. Our carbon footprint is much smaller than similarly sized office-based business in the Northeast. We offer competitive benefits including health, dental, disability, 401K, T passes for those who plan to commute via public transportation, and three weeks paid vacation (and up to five weeks after multiple years of employment).

NMR's headquarters are near the Davis Square subway station in the Boston area, although some Research Analysts work from home offices in various parts of the country. NMR is open to a similar arrangement for this new position if the fit is right.

Submit resumes and cover letter to [openings@nmrgroupinc.com](mailto:openings@nmrgroupinc.com). Please include the position title in your email header.

NMR is an equal opportunity employer. Applicants who would increase our strategic advantage by adding to the diversity of backgrounds of our team are encouraged to apply.
