FACILITIES ENGINEER – Watertown, MA

For nearly a century Barclay Water Management, Inc. has been recognized as a leading provider of water treatment programs to protect water and steam heat exchangers and related piping systems. The company's Environmental Group develops custom water hygiene programs to minimize the risks associated with Legionella bacteria and other waterborne pathogens in building water systems. A closely controlled water treatment program is an essential element in every streamlined facility. We focus on providing clients with superior, cost-effective water treatment products and services, delivered by some of the most experienced and educated water treatment engineers. We are looking for a hands on Facilities Engineer that can maintain all plant utilities, buildings and property. Plant utilities include compressed air generation equipment, electrical distribution, fire protection systems, city water supply, deionized water generation, hot water generation, safety showers and eye wash stations. The successful candidate would also help with design and the implementation of project work at the plant to help improve safety, efficiency and quality of processing finished goods.

Responsibilities include:

- Responsible for purchasing and keeping inventory of all maintenance equipment and supplies
- Maintenance of all manufacturing equipment and physical plant
- Provide emergency/unscheduled repairs of production equipment
- Create a preventative maintenance schedule and ensure these tasks are completed
- Create a work order system and scheduling tasks based on priorities
- Ability to drive projects to completion
- Calling and scheduling outside contractors for work at the plant
- Troubleshoot equipment and make necessary repairs or recommendations
- Ensure compliance with all rules, regulations and policies pertaining to safety and environmental concerns

Qualifications include:

- B.S. in Engineering (Mechanical, Chemical, Industrial engineering or other related degree)
- 0 to 3 years of relevant work experience in a manufacturing setting with an understanding of plant processes, equipment and technology
- Experience with maintaining manufacturing equipment and working in a physical plant
- Ability to understand engineering drawings
- Design work with pumping, pressure and metering systems
- Good mechanical skills specifically with plumbing
- Experience using hand and power tools is required
- Experience working with and repairing centrifugal and air diaphragm pumps is a plus
- A self-starter capable of prioritizing improvement opportunities and working toward continuous improvements
- Excellent oral and written communication skills
- Valid driver's license with a good driving record
- Must be authorized to work in the United States

Barclay Water Management, Inc. offers a competitive salary and benefits package including an ESOP (Employee Stock Ownership Plan). Qualified Facilities Engineer candidates are encouraged to send a cover letter and resume to our Human Resources Department at careers@barclaywater.com.
